For Staff and Parents/Guardians who did not receive the School Messenger Opt-in Text

If did not receive an initial opt-in text message from School Messenger, then simply send a text message to the shorthand text number: **67587**

The message should be just “Y” and hit send.

This will subscribe parents/guardians and staff to the School Messenger service.

If you text the 67587 short-code and receive an error on your phone, you may need to reach out to your carrier to make sure that you are able to send and receive texts from short-codes. Some carriers do not automatically add this to accounts, with T-Mobile being one of the carriers that most frequently does this, but once you reach out to your carrier and verify that you are able to send and receive texts to short-codes, you will be able to reply or text the 67587 short-code to opt-in, and you will receive the confirmation.

Please note that many users may have employer-owned cell phones, and these types of services may be blocked. The subscriber can reach out to the service provider (a one-time process) to allow this subscription.

Thank you.
