

# Robotics Club

Grades: 5-8

Coordinator: Mr. Mark Novak

Meeting Date/Time: Wednesday 2-3pm

Description: Students will learn the basics of 3D modeling and printing through a diverse curriculum designed for students of all skill levels. Whether a student has never done any 3D printing to a student who has vast experience, students will use 3D printing software to design and create unique designs and tools to learn how 3D printing works in real world applications, as well as learn the ins and outs of the machinery itself and how it works in real time

**Cost is \$185 per student for 10 weeks**

**September 27**

**October 4, 11, 18, 25**

**November 1, 8, 15, 29**

**December 6**
